Fishing Report

Barra season is upon us once again and Lake Monduran has sure lived up to it's reputation as being Australia's premier sport fishing impoundment. Over the previous couple of months we have had some anglers reporting up to 8 to 10 boated barra per day ,now that is awesome fishing. This month we will see a lot of anglers fishing the main basin and bird bay either trolling the deep water or casting to the weedy edges. If trolling is your cup of tea stick with one general rule and that is if you are in shallows use shallow diving hard body lures (1m) and if you are in the deep use deep diving hard body lures (4m+). Soft plastics such as Squidgie slik rigs in the pro range have been working well in the shallows for casting towards the weed beds on points and shallow bays.

Barramundi fishing can be frustrating at times, so just remember be patient and be confident in the spot you are fishing because the rewards far out weigh the agony you may put yourself through to catch that fish of a lifetime.

Your Rigging, when using soft plastics I would recommend using 30 to 50lb braid on your main line and nothing less than 80lb mono leader, the reason being that the barra will normally swallow the soft plastic right down into there gill plates and if you hook them down that far they will close their mouths, get a couple of head shakes on you and wear through the leader. Their teeth are like 80 grit sandpaper.

If your not having too much success with barra grab some bait from the kiosk or a bait trap and put them in and around the weed beds for some live shrimp.

We have seen some great size bass and even barra caught over the past month on live shrimp.

If you are having trouble getting a barra or not to sure about the gear you are using don't hesitate to come and see us at the office for some advice on where to go and what to use.

HAPPY FISHING!
